

Five-point star

Five outward points with five inward corners between them.

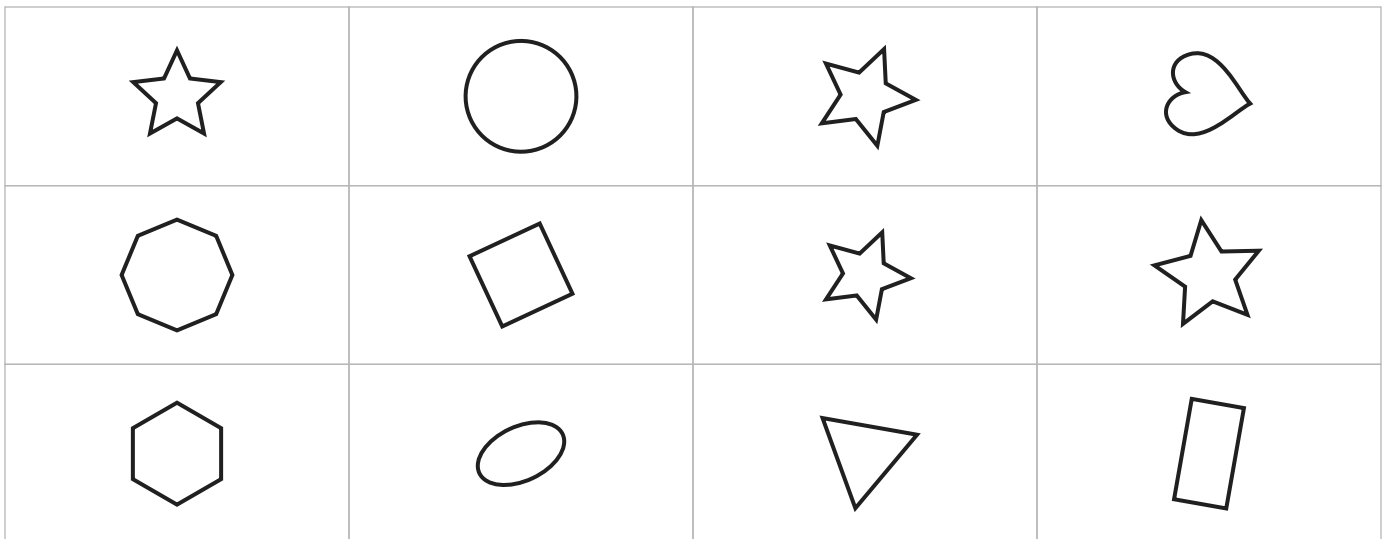

1. Look at the outline.

Trace its boundary with a finger. Color the inside any way you like.

This outline has ten straight edges and ten corners in total.

2. Find four matching shapes.

They can be smaller, larger or turned. Color each match.

3. Make one your own.

Draw the shape below, or turn it into a picture. Any idea is welcome.
